DUST CAN'T LEAVE FROM THE WATER

Roboclean SPLUS put dust, mites and bad smells in to the water and after that gives clean air to the outside. This amazing filtration system catches %99,99 of dirt [by weight].The rest microscopic particles are held by HEPA filter. This filtration combination removes almost %100 of dirt.

FRESH AIR WITH IONIZER FUNCTION (NEGATIVE ION)

Roboclean SPLUS washes air with water and also beside that can give 2 million units negative ion to 1 cm3 air.

THERE IS NO OTHER SOLUTION FOR DUST MITES

Roboclean SPLUS catches dust mites and fungus from carpets, armchairs and beds. These harmful wastes and the other microscopic things can't turn back to the home area from water ever.

VACUUMING

You can vacuum by putting things such as pillows, quilts, etc. to the bag. Interior of your items will become free of dust and mites. Moreover, you can reduce the volume of your vacuumed bulky materials such as quilts, bedding etc., store them in much less space for a longer time.
