ABOUT US

PROFILE

Basaran Ship Building & Repairing Co. has continued to grow and able to achieve high quality services. Basaran always emphasizes customer satisfaction and provides quality services to customers namely Government Agencies, oil and gas companies, marine and shipping companies, engineering and construction companies. Our company philosophy is "To Serve the Best" to our clients and to keep good business relationships with our clients for win-win business situation.

Basaran build more than 50 vessels includes barges, tankers, tug boats, pilot boats, pusher boats, fishing boats, oil recovery boats, garbage recovery boats, dredgers, passanger vessels...etc.

Basaran was one of the first mobile sub-contractors to offer a ship-repair service in TURKEY. Basaran has specialised in the repair of bulkers, LNG carriers and oil/chemical tankers and now offers services more than five main areas. This include total shipyard services on behalf of owners, agents, and brokers; total engine repairs or reconditioning; steel renewal and pipework; overhauling; propeller shaft repairs; electric-electronic works...etc.

Since it had first started to its operation some 20 years ago, the group has always been the biggest player within marine sector and still continues to claim for providing the highest quality standards in the service. Today Basaran set up a 2.000 m² new factory in Guzelyali Area, Istanbul to manufacture equipments; air pipe heads, pipe couplings, cranes, hose/rope drums, mud boxes, valves, scupper plugs, doors, ladders, Panama chocks.

Shipbuilding yard is equipped with the latest technology, Pendik, Istanbul coast of the pitch covers 953,000 m². 450 tons of dry dock and shipyard crane service receipt that can be built in one piece has reached the value of the largest ship 170,000 DWT shipbuilding.

Shipyards, with facilities that can produce their own needs logistical support structure. These oxygen-nitrogen plant, acetylene plant, paint manufacturing plant, galvanizing plant, central heating system, compressed air, it can be noted as a center and substation.

Istanbul (Pendik, Istanbul) Shipyard dry dock: 300 x 70 x 8,5 m. 450-ton and 300-ton gantry crane gantry cranes in operation. 170,000 DWT ship docking area. Lifting capacity of 10,000 tons (Floating Dock) are available. There is 200 m on land slipways. 1 pce closed area (hangar) is available. Ship Repair capacity 3.500.000 DWT / Year

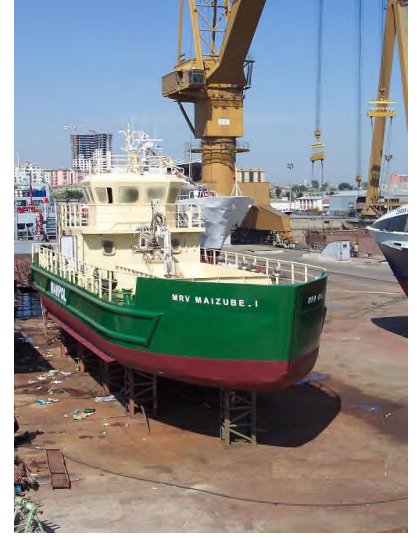

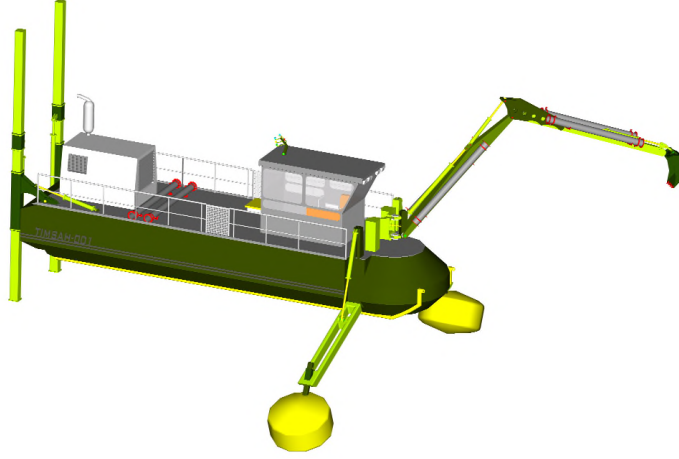

Another activity that Basaran Group has for the past 5 years been able to offer spot assistance in the event of an oil spill and Marpol 73/78 waste sludge/ bilge/ ballast water/ garbage collection services. We started building steadily over the years our own anti-pollution inventory including own fleet anti-pollution vessels...etc.

The experience gained through the group's active involvement in a wide range of incidents, from small spills up to the large extent disasters, gave us the advantage of knowing how to respond in case of an oil spill.

Hopping to co-operate with u and to give our best service for all yourwork in Turkey.
