Stone Index

About Us

Stone Index has been established in 2004. for the purpose of export marble, travertine, quartz and handicrafts basicly made of marble and travertine across the globe. We are proudly associated in the preservation of rich Turkish handicrafts.

Our experience in the industry has given us the knowledge about the customer needs. We always strive to provide our customers superior quality products and world class customer service. Our range of exquisite products is value for money and best in the world. Stone Index represents highly quality material, excellent service and on time delivery. Our services include inspection of all materials (mosaics, borders, profiles, tiles, slabs and blocks).

Mission

Our mission is to fulfill the expectations of our customers at highest level by developing our product and service quality continously and cretaing strong emotional bonds for generating customer loyalty.

Vision

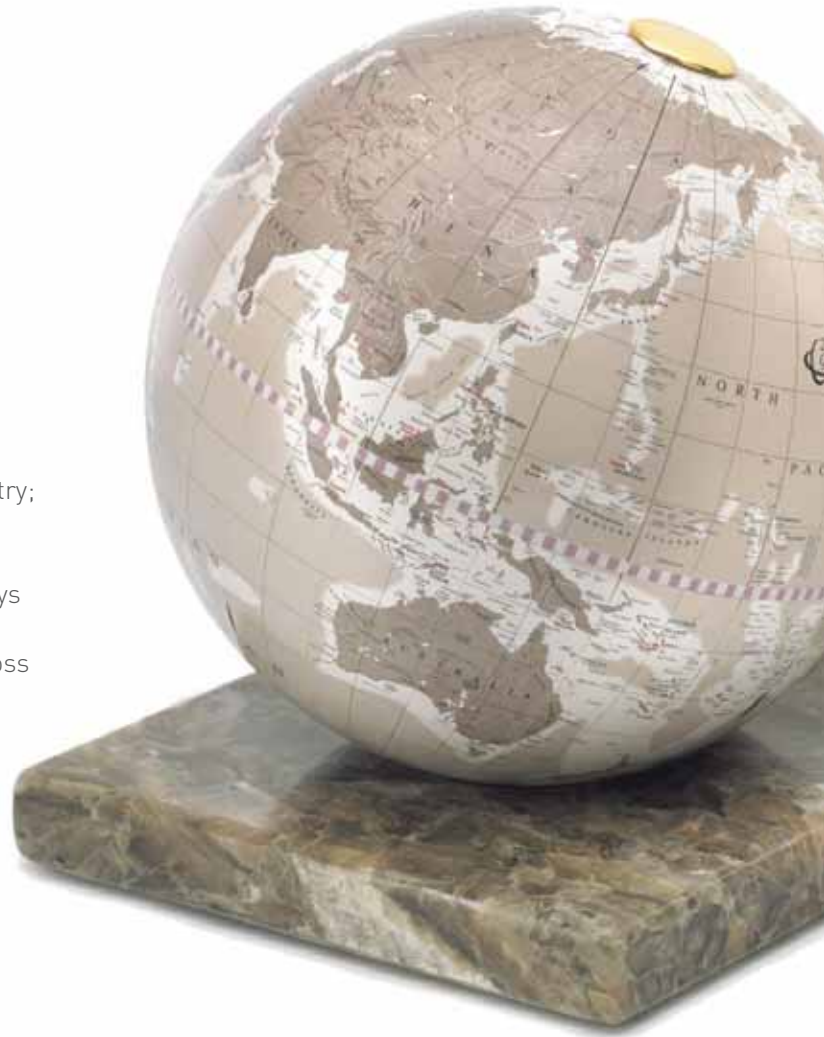

Our vision is to become a pioneer, trustworthy company which increases it's productivity and industrial efficiency constantly at global market.

Your Global Partner

- With all our experience in natural stone industry; we deliver globally proved quality and trust.

- With our customer oriented concept; We always strive to provide our customers superior quality, products and world class customer service across the globe.

- **Experience • Commitment**
- **Sincerity • Reliability**
- **Competence • Trust**

SERVICES

Quarry Selection & Inspection

One of the most important services that Stone Index provides is Quarry selection & inspection. If the customer project is a long term one with several shipments, selected quarry needs to have enough reserves and the required regularity for each shipment. Stone Index inspectors check them on site. Since marble & travertine are natural products, 100% regularity can never be guaranteed. Stone Index provides the most possible regularity that meets customer requirements.

Factory Selection & Inspection

Once the quarry is selected, the most suitable factory should be selected according to the required product specifications and schedule. Factory should have the capability to manage the product specifications (e.g. having tumbling, polishing, honing etc. process or being able to manage mosaics) and its allocation should be available according to the customer schedule. Stone Index inspectors can handle this issue on behalf of the customers.

Product Q&A Inspection

After the product is manufactured according to the customer schedule and specifications, Q&A inspection is done by Stone Index. This service covers the quality, regularity, dimensions and packing process of the product.

Loading

Stone Index inspectors make sure that the lashing service is done properly for the safety of the shipment.
